

Batch Pasteurizer

Advanced model PP 150-1000L

For the production of high quality food products!

The **Pac Cool Pasteurizer Advanced model (PPA)** is specially designed for small scale processing of food products in a range of 150, 300, 500 and 1000 litres. The pasteurizer forms a stand-alone small processing plant which can be used for the pasteurization of liquids such as milk, cream, fruit juice, egg yolk,... and for the production of yoghurt, cheese, etc...

The unique combination of double jacket and closed water circuit results in an efficient energy transfer. In this multifunctional tank, the complete process can be automated without interference of the operator.
